

Lunar Eclipse Public Viewing

**Sunday, September 27
8 - 10:30 p.m.
West Side of Cardwell Hall
(Physics Building)**

Large telescopes and binoculars will be set up on the west side of Cardwell Hall on the KSU campus to view the lunar eclipse this Sunday evening, September 27. The Harvest Moon will pass into the Earth's umbra shadow beginning at 8:07 pm CDT. Full eclipse begins at 9:11 pm. Although the eclipse will be beautiful to the naked eye, viewing through telescopes gives another exciting perspective. Your hosts will be physics professors and amateur astronomers from the Department of Physics. Walk by anytime from 8 pm to 10:30 pm.
